

RSMLH

A digital studio in Riyadh.

We design and build websites, apps and platforms, then look after them long after launch, in Arabic and English.

Riyadh · Since 2008

About us

A new field, not a new company.

RSMLH is a Saudi company, registered in Riyadh since 2008. Today we focus on one thing and do it properly: we design and build websites, apps and platforms for companies and public bodies across the Kingdom, and look after them once they are live.

We work as one team from the first meeting to handover and beyond, with no middlemen. We write every version in its own language, measure every site with Google's own tool before we hand it over, and put every promise we make in the contract.

We work with

Clinics & medical groups

Real estate

Online stores

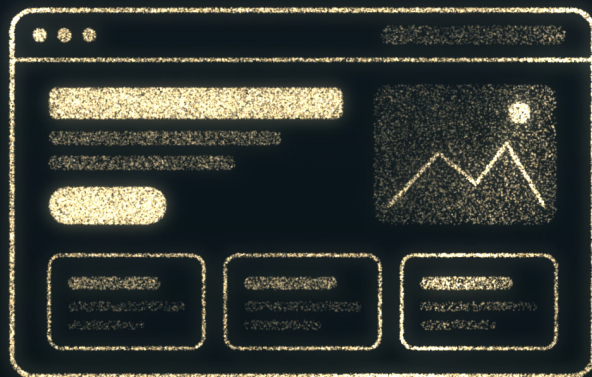

Companies & consultancies

Industry & energy

Government

— Services

Four services. One team.

01

Websites

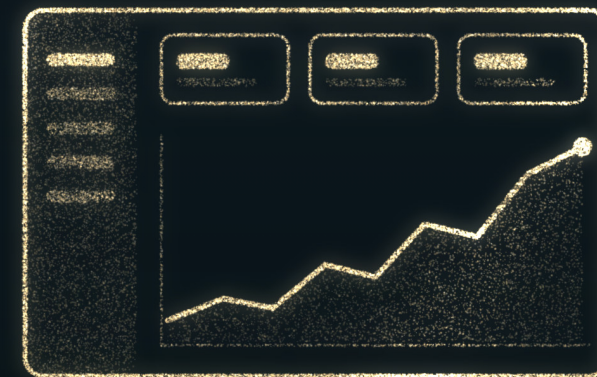

Fast on mobile, clear from the first screen, and easy for Google to read. For companies, online stores and campaign pages.

02

Apps

iOS and Android apps your customers open every day, because they get the job done in fewer taps.

03

Platforms

Dashboards, portals and internal systems that take the repetitive work off your plate and put your numbers in plain view.

04

Care

Hosting, updates, security and monthly measurement, with a direct line to the people who built your product.

 Website design

Web design that works, and sells.

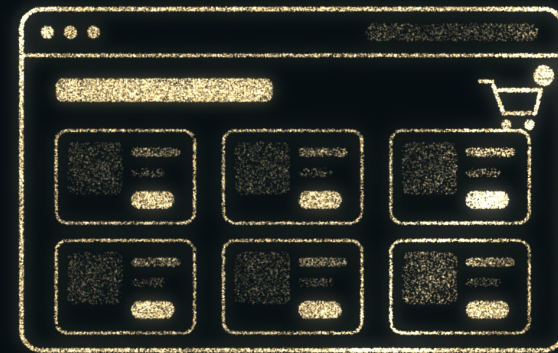

We design your site around your identity, not a template. It opens fast on any phone, Google reads it properly, and we write the copy in Arabic and English. A fixed price in the contract, with no surprises.

01

Company website

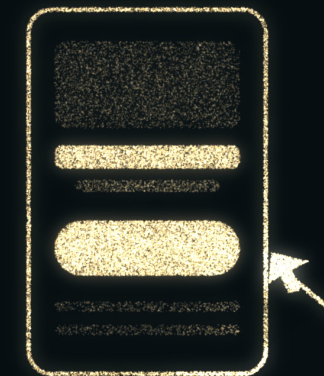

Tells people what you do from the first screen and makes it easy to get in touch. For companies, clinics, offices and public bodies.

02

Online store

On Salla or Zid, or custom-built when you need more freedom in design and in connecting your own systems. We help you choose for your stage.

03

Campaign landing page

One page, one goal: it receives your ad traffic and turns it into enquiries, with every click measured.

04

Upgrading a site

We audit your current site and tell you plainly whether improving it is enough, or whether a rebuild saves you more in the long run.

A company website is done **within a week.**

Stores and larger sites follow a schedule agreed at the start.

— What you get

Everything your site needs, in one contract.

Every item is written into the contract.

- ✓ **Design built on your identity**
A site that reflects your business and stays with your visitors, not a template that looks like everyone else's.
- ✓ **We write the copy**
We write and polish your site's text in Arabic and English, each one written in its own language.
- ✓ **Fast on mobile**
Opens in seconds on any phone and any network, measured with Google's own tool before handover.
- ✓ **Ready for Google**
Sound structure, titles and descriptions, so it can show up in search from launch day.
- ✓ **Works on every screen**
Phone, tablet and large display: we test every size before anyone else sees it.
- ✓ **Analytics and tracking**
We connect analytics and track enquiries, so you know what actually brings customers in.
- ✓ **Domain and first-year hosting**
We register the domain and set up hosting in your name, as part of the proposal.
- ✓ **Free maintenance for a year**
Updates, security and a direct line to the people who built your site, with no middlemen.

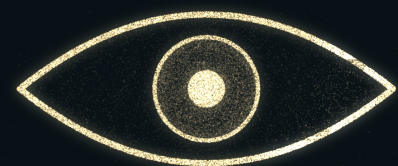

— Speed

Speed isn't a promise. It's a number.

This is our own site, rsmlh.sa, on mobile in Google PageSpeed Insights. It's the same yardstick we hand client sites over on, and you can check it yourself.

Google PageSpeed Insights · mobile · September 2026

Check your own site with the same tool, free.

How fast it opens on a phone, where visitors stumble, and whether Google reads it properly. In plain words, in about a minute.

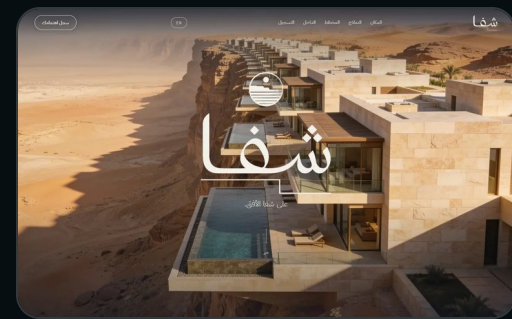

rsmlh.sa/site-check-en

— Work

Work you can open yourself.

Six concept brands in six sectors, each with a complete identity, code written from scratch and a presentation that suits it. All live, so you can judge the build quality before you sign.

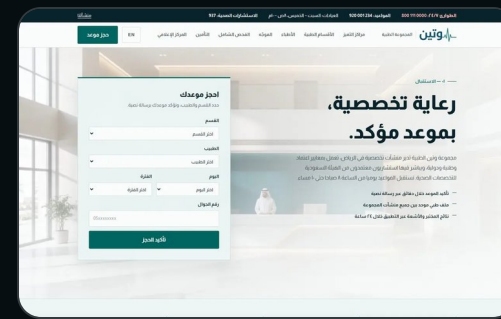

Shafa

Real estate

A residential community on the cliff edge, with an interactive plan to pick your plot.

shafa.rsm1h.sa

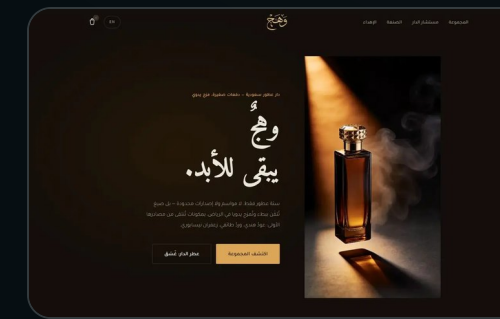

Wateen

Medical group

A hospital group with a guide that suggests your department and prepares your booking.

wateen.rsm1h.sa

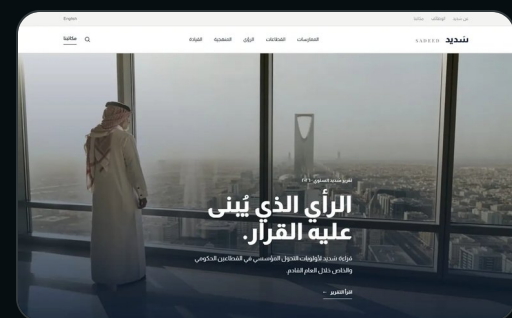

Wahaj

Perfume house

A perfume house with a working cart and an advisor that recommends your scent.

wahaj.rsm1h.sa

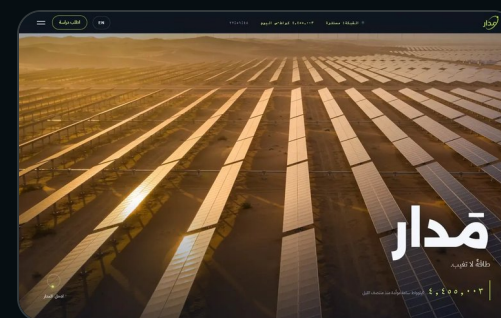

Sadeed

Consulting

A bilingual consultancy with a maturity index that benchmarks your score against the sector.

sadeed.rsm1h.sa

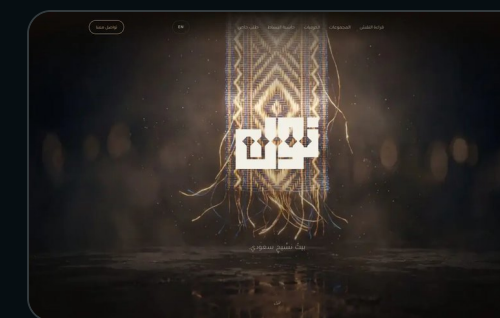

Madar

Renewable energy

An energy developer with a live savings calculator and real-time counters.

madar.rsm1h.sa

Nawl

Sadu weaving

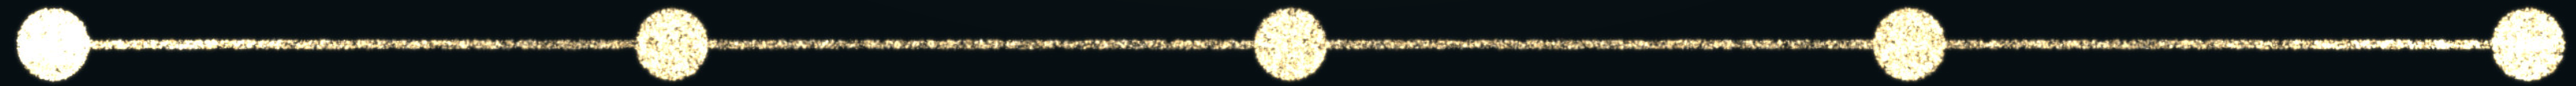

A Sadu weaving house whose hero weaves itself as you scroll.

nawl.rsm1h.sa

The six are fictional brands we designed to show the standard of our work in each sector; their names and figures are illustrative. We walk you through client projects in person, with their consent.

How we work

Five gates to launch.

01

Discovery

We study your project before we move: your goals, your users, your competitors, and what the market is missing.

02

Direction

Strategy and design: one clear line to the goal, which you see and approve before a single line of code.

03

Build

We build in weekly releases you can see for yourself and steer as we go.

04

Testing

Every screen, every device, every state, before anyone else sees it.

05

Launch

A live, monitored launch, and a handover with every key.

Every gate ends with something you can see and sign off before we move on to the next.

— Why RSMLH

Promises in writing, not talk.

Guarantee

Not happy? Your money back, in full.

Any time before launch, for any reason, we refund everything you paid within 7 working days. No questions asked.

Guarantee

Unlimited revisions.

We revise until it's right. The contract sets the scope, not the number of rounds.

Ownership

Everything is yours.

Code, design, accounts and domains. Nothing is held hostage.

Access

A direct line to the team.

No middlemen between you and the people designing and building your product.

Two languages

Written, not translated.

Each version is written in its own language and rhythm, so it persuades its own reader.

Local market

We know the Saudi buyer.

We know Salla, Zid and how customers here behave: what convinces them, and what puts them off.

Let's begin

Got an idea?
We'll cast it in gold.

Tell us what you're building. We reply within a working day.
